How heavy?

You will need some kitchen scales that can weigh things in kilograms.

- Ask your child to find something that weighs close to 1 kilogram.
- Can he / she find something that weighs exactly 1 kilogram?
- Find some things that weigh about half a kilogram.

Out and about

- During a week, look outside for 'thirties' numbers, such as 34 or 38, on house doors, number plates, bus stops, etc. How many can you spot? What is the biggest one you can find?

31 39 36 35 33

- Next week, look for 'fifties' numbers, or 'sixties'…

How much?

- Once a week, tip out the small change from a purse. Count it up with your child.

Helping Your Child to Hit Their Maths Target

NEWTON PRIMARY SCHOOL

Year 2

Year 2

By the end of Year 2, most children should be able to…

- Order and count numbers up to at least 100, and read and write numbers to 100
- Understand place value of number up to 100
- Count forwards and backwards in ones or tens from any two-digit number, e.g. *twenty-six, thirty-six, forty-six…*
- Recognise odd and even numbers
- Understand and use symbols for addition, subtraction, division and multiplication
- Add and subtract numbers under 20 in their heads
- Recall number facts to 10 to find other facts, such as 3 + 7 = 10 so 30 + 70 = 100
- Double and halve small numbers, e.g. double 9 is 18, and half of 18 is 9
- Know by heart the 2 and 10 times tables
- Find the total value of a handful of coins to £1
- Measure or weigh using metres, centimetres, kilograms or litres
- Read hours and minutes on a 12-hour digital clock and tell the time to the half and quarter hour
- Know the order of the days of the week, months of the year and seasons
- Gather and record, extract and interpret data from lists, tables, diagrams, block graphs and pictograms
- Solve simple number problems, and explain how to work

About the targets

These targets show some of the things your child should be able to do by the end of year 2. Please be aware that in line with the requirements of the new curriculum your child is taught at their stage of learning, which is based on their individual need.

Some targets may be more complex than they seem, e.g. children may know how to work out sums on paper but need to see when it is quicker to work them out in their heads.

Fun activities to do at home

Number facts

You need a 1–6 dice.

- Take turns. Roll the dice. See how quickly you can say the number to add to the number on the dice to make 10, e.g.

and **6**

- If you are right, you score a point.
- The first to get 10 points wins.

You can extend this activity by making the two numbers add up to 20, or 50.
